[Install Windows Edge On Server 2012 R2](#)

Remote Access Setup

### Remote Access Server Setup

Configure DirectAccess and VPN settings.

Network Topology

Network Adapters

Authentication

Select the network topology of the server.

- Edge
- Behind an edge device (with two network adapters)
- Behind an edge device (with a single network adapter)

In this topology, the Remote Access server is deployed with a single network adapter that is connected to the internal network.

Type the public name or IPv4 address used by clients to connect to the Remote Access server:

< Back   Next >   Finish   Cancel

The screenshot shows the 'Remote Access Setup' window, specifically the 'Remote Access Server Setup' section. The title bar reads 'Remote Access Setup' with a close button. Below the title bar, the main heading is 'Remote Access Server Setup' with the subtitle 'Configure DirectAccess and VPN settings.' A left-hand navigation pane contains three items: 'Network Topology' (selected), 'Network Adapters', and 'Authentication'. The main content area is titled 'Network Topology' and contains the following text: 'Select the network topology of the server.' followed by three radio button options: 'Edge', 'Behind an edge device (with two network adapters)', and 'Behind an edge device (with a single network adapter)'. The third option is selected. Below this, a paragraph states: 'In this topology, the Remote Access server is deployed with a single network adapter that is connected to the internal network.' At the bottom of the main area, there is a text prompt: 'Type the public name or IPv4 address used by clients to connect to the Remote Access server:' followed by a text input field containing 'directaccess.ppcu.com'. At the bottom right of the window, there are four buttons: '< Back', 'Next >', 'Finish', and 'Cancel'.
