FAQ

[Pantone App For Mac](#)

7. Follow the prompts in PANTONE Color Manager to measure the displayed colors and create a profile.
8. A "Display Calibration" message will appear on the device asking if you want to profile the display. Select "Yes".
9. Follow the instructions in PANTONE Color Manager. When the process is finished, the new profile will be used with myPANTONE on the mobile device. It is a good idea to re-calibrate every month.

### Export CMYK to a Mobile Device

PANTONE Color Manager allows you export CMYK values to your iPhone 4, iPad or iPod Touch 4 using the myPANTONE 2.0 (or later) application. Generating ICC-based CMYK values that are specific to your workflow will optimize the colors you see on your mobile device.

#### Requirements:

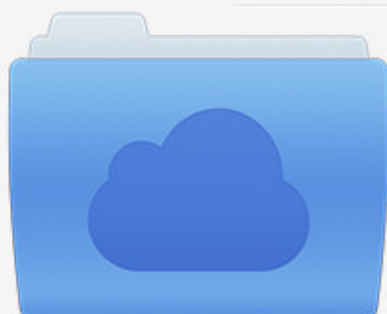

- Download the myPANTONE application from the iTunes App Store.
- A wireless network is necessary to complete this process.
- It is important to keep the mobile device active throughout the entire process. If it goes to sleep, the export will fail.

1. Launch PANTONE Color Manager.
2. Make sure your mobile device is on the same network as your computer and launch the myPANTONE app.
3. In PANTONE Color Manager, select "File > Export > CMYK to myPANTONE".
